

INSTITUT FÜR INFORMATIK
UNIVERSITÄT BONN

PROCEEDINGS

OF THE

4TH WORKSHOP ON ARTIFICIAL INTELLIGENCE

FEB. 19 - 23, 1979

BAD HONNEF, WEST GERMANY

FOREWORD

The Workshops on Artificial Intelligence, sponsored by the Fachgruppe Künstliche Intelligenz of the Gesellschaft für Informatik are intended to provide a facility for quick and informal interaction among the emerging AI-community in Germany and other European countries.

Like its predecessors, the 4th Workshop on AI was organized without any refereeing. Contributions were invited from all areas of Artificial Intelligence. All submitted contributions were presented at the Workshop. The Workshop was attended by some 60 participants from Austria, Denmark, France, Netherlands, U.S.A., and Germany.

These Proceedings contain abstracts or extended summaries of all 34 presentations. There were no formal requirements, and was left to the authors' discretion to submit a short abstract, extended summary, or even a full paper (unless exceeding some space limitation). The papers are ordered in the order of presentation.

Requests for further copies should be addressed to:

P. Raulefs
Institut für Informatik III
Universität Bonn
Postfach 2220
D-5300 Bonn 1, West Germany

Requests must be accompanied by a check for DM 15.00
(or UK-£ 4.00 or US- $\$$ 8.00 drawn on a British/US bank).

The Workshop was supported by the Bundesministerium für Wissenschaft und Forschung (Bonn, W. Germany), and the Institut für Informatik III of Bonn University.

CONTENTS

Logic of uncertainty - a model and examples of application: <u>P. Scheffé</u>	1 - 3
Natural Language Processing and Information Retrieval: <u>Dr. Jürgen Krause - IBM Deutschland</u>	4 - 20
Kooperatives Dialogverhalten im Stimulationssystem HAM-RPM: <u>Wolfgang Hoepner, Anthony Jameson</u>	21 - 31
PROTEX - A System For Pronoun Interpretation in Texts: <u>Albrecht Fauser, Stuttgart</u>	32 - 49
Gemeinsame Aspekte verschiedener Beweisverfahren: <u>W. Bibel - TU München</u>	50 - 51
A Net Based Theorem Proving Procedure for Program Verification and Synthesis: <u>J.L. Darlington, GMD Bonn</u>	52 - 61
Ein korrektes und vollständiges Beweisverfahren für die Allgemeingültigkeit von Relationengleichungen: <u>W. Schönfeld, Universität Stuttgart</u>	62 - 72
Resolution with Complex Clauses: <u>W. Dilger, Mannheim und Guido Persch, Karlsruhe</u>	73 - 88
A Guided Tour through a Working Theorem Prover: <u>J. St. Moore, Menlo Park, Ca. USA</u>	89 - 97
A Methodology for Recursion to Iteration Program Transformation Using a Generalization Technique: <u>I. Kodratoff, Paris</u>	98 - 102
A System which Synthesizes Array-Manipulating Programs from Specifications: <u>M. Bidoit, C. Gresse, G. Guiho</u>	103 - 111
Concurrent Logic: <u>M. Dausmann, G. Persch, G. Winterstein</u> <u>Universität Kaiserslautern</u>	112 - 119

Augmenting the Usefulness of Variables: The Fitter View: <u>H. Boley, Hamburg</u>	120 - 134
Strategien zur Analyse von Szenen mit Bewegung: <u>B. Neumann, B. Radig, Hamburg</u>	135 - 139
Parts Hierarchies: <u>L.K. Schubert, Karlsruhe</u>	140 - 145
Representation of Knowledge by Means of Nonprocedural Languages and their Compilers: <u>D. Gernert, München</u>	146 - 147
Applying Game Programming Methods to Natural Language Tutorial Systems: <u>H. Marchand, Frankfurt</u>	148 - 157
Algorithms for Universal System Optimization: <u>D. Lazak, Groningen, Netherlands</u>	158 - 169
The Markgraf Karl Refutation Procedure: <u>N. Einsinger,</u> <u>J. Siekmann, E. Unvericht, Karlsruhe</u>	170 - 177
A Short Survey on the State of the Art in Matching Problems: <u>J. Siekmann, Karlsruhe</u>	178 - 193
The Undecidability of the D_A -Unification Problem: <u>P. Szabo, Karlsruhe</u>	194 - 207
Unifikation von Morphismen: <u>E. Vogel, Karlsruhe</u>	208 - 213
Unification in Collapsing Equational Theories: <u>P. Raulefs, Bonn</u>	214
Unification under Power Associativity: <u>Ch. Peltason,</u> <u>P. Raulefs, Bonn</u>	
Automatic Learning: <u>J.P. Treuil, B. Melese</u>	215 - 225
A Theoretical Frame for the Grammatical Inference of L-Systems: <u>W. Coy, Dortmund</u>	226 - 227

Object-Oriented Programming and the Glass-Box Approach- Implications for Problem Solving and Knowledge Representa- tion: <u>G. Fischer, Stuttgart</u>	228 - 242
Maschinelles und menschliches Lernen am Beispiel eines Grammatik-Lernprogramms: <u>E.R. Reichl u. a., Linz, Österr.</u>	243 - 244
Versuch einer naturwissenschaftlichen Interpretation psychischer Phänomene: <u>P. St. Pütter</u>	245 - 267
A Procedural Grammar for Sentence Production: <u>E. Hoenkamp & Gerard Kempen, Nijmegen, Netherlands</u>	268
Der ATN-Formalismus als Programmiersprache: <u>Th. Christaller, Bielefeld</u>	269 - 274
Interfacing a Semantic Net with a Semantic Grammar: <u>J. Laubsch, Stuttgart</u>	275 - 286
Parallelverarbeitung bei der automatischen Sprach- analyse: <u>G. Görz</u>	287
Zur Darstellung von Handlungsabläufen in einem Informationssystem: <u>K. Hess, Bonn</u>	288 - 297
